Project Controls Development Program (PCDP)

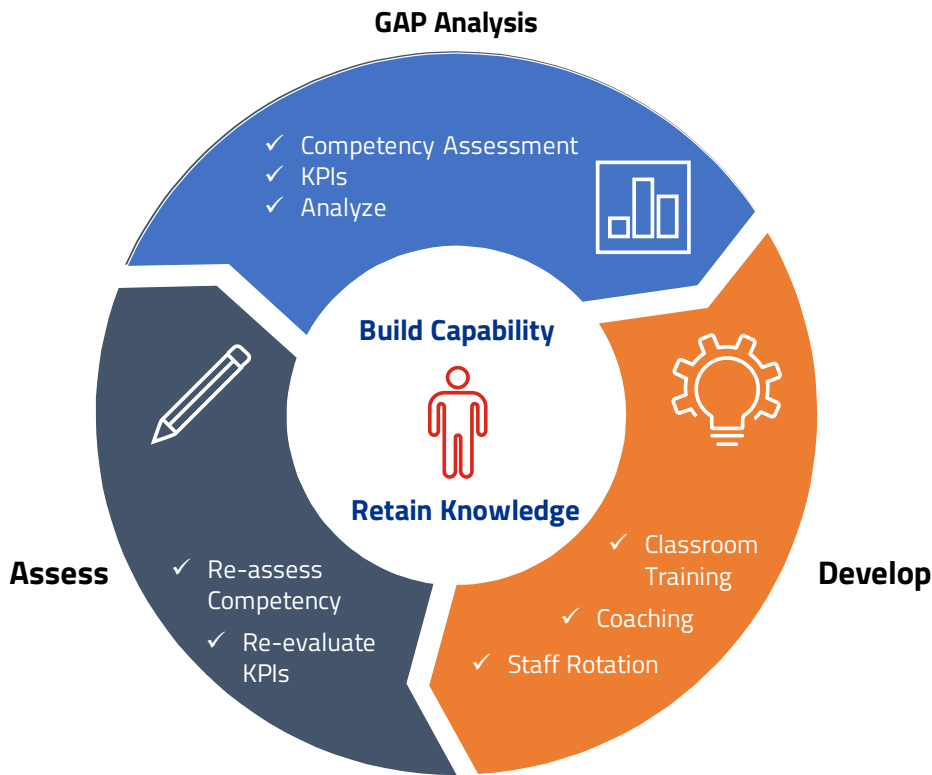

Development Programs that Deliver

Developing your Project Controls Team

Increased industry demands, introductions of new technologies and absence of tool and resources to purposely capture and retain knowledge, all put increased pressure on our customers. Pressure to accelerate workforce development and fast track careers.

The PCDP provides the framework, structure, content and delivery mechanisms to accelerate knowledge transfer and fast track careers.

Programs designed using language our customers understand.

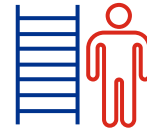

Who is the Target Audience?

This program is designed to cater for those new to Project Controls or those who wish to formalise their skills.

We work with our clients to create career maps for each individual entering onto the program, by designing competency surveys which serve to benchmark current performance capabilities.

PCDP Modular Training Program

Each of our training modules provides the participant with hands-on skills and knowledge using client specific case studies and procedures.

Module 100
Introduction to
Project Controls

Module 01
EPC Schedule
Development

Module 02
Deliverables
Management

Module 03
Commercial
Performance
Management

Module 04
Introduction to
TIC Estimating

Module 05
TIC
Management

Module 06
Schedule Risk
Analysis

Module 07
Cost Risk
Analysis

Coaching Program

Our coaching programs are focused on improving professional skills with the coaching relationship expecting to only last for the duration of the competency gap closure. Once competency is achieved, new competency developments targets are set and achieving these targets could require a completely different skill-set (and coach). The Academy can provide training within our customer organisations for coaches and those managing the coaching programs.

Staff Rotations

The Academy can provide guidance on setting up a structured staff rotation program that works for the client organisation. Staff rotation, designed to be temporary is a tool which can be used to fulfil knowledge gaps. From our experience, the two candidates that are rotating should be of equal calibre but requiring a lateral transfer of skills.
